

October Highlights at Foundations EDU

We explored nature on a beautiful, Autumn day and collected leaves to make a cool art project!

Beautiful day calls for a picnic.

We built towers out of marshmallows and toothpicks as a STEM project and learned how to design and engineer the strongest, tallest tower.

Practicing math facts with Goldfish crackers is a fun, yummy way to learn!

The Olympics weren't canceled here! Our closing ceremony at Foundations EDU Olympics was a great time as students were recognized for their outstanding achievements throughout our Olympic Games and received their handmade Olympic salt dough medals. Congratulations to all of our Olympians!

Ready to paint some pumpkins!
