

December Highlights at Foundations EDU

We painted a beautiful winter scene. We practiced blending colors and learned a new technique with a fan brush to make an evergreen tree in the snow.

We made some awesome things in our "Ultimate DIY Week." Kierstin is trying out our homemade sugar scrub. Washing your hands can be fun (and smell great too)!

Our students worked hard decoding many messages to complete the "Spy Week" challenge and get the secret message. Miss Lavender demonstrates how to move through the course without touching any of the "lasers."

We love playing outside even when it's cold! We had so much fun in the snow!

Our students and staff have been working so hard to continue learning and thriving, even with so many school districts switching to virtual learning.
