

March Highlights at Foundations EDU

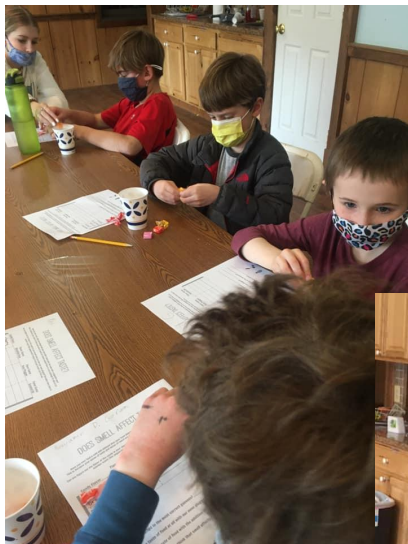

Students pieced together maps and worked together to solve the riddles and use their navigational skills to search all around to find the buried pirate treasure! These bright young lads are ready to be fitted for their pirate hooks.

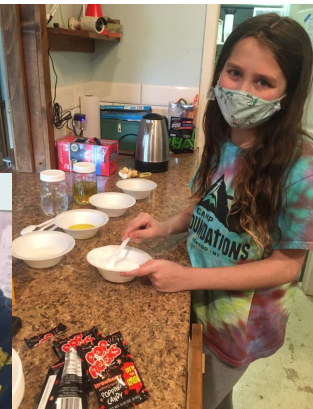

A special thanks to Mrs. Cindy Bouffard who volunteered to teach us about and help us grow flowers for Mothers Day! We even learned how we can recycle milk jugs to use as greenhouses until it's warm enough to plant them in the ground.

So cool! We're having fun watching them grow. Stay tuned to see how they turn out!

We learned about our 5 senses, exploring how they function and work together! We intently listened to the pop rocks to determine what kinds of liquids make them "pop" the loudest.

Disney should hire these artists, don't you think?
