

# June Highlights at Foundations EDU

The return of our pirate theme was a blast! Our students followed the hidden clues all around, to get to the buried treasure. They showed great teamwork and cooperation as they worked together through this challenge.

Bringing back our favorite themes wouldn't be complete without "Ultimate DIY" We love crafts and this week was no exception. We made soaps, making it so much fun to stay clean, bye bye germs! We made lip balms, magnets, and repurposed old crayons by melting them down to make new ones. We also made juice popsicles for a cool, healthy way to beat the heat! Yum!

Our final day was a huge success, revisiting another of our favorites, "Spy School." They demonstrated

great teamwork as they cheered each other through all of our spy challenge stations. Our spy recruits did an amazing job working together to increase their agility and precision, enhance their observational skills, and learn the value of cooperation to complete their training!
